DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 1-4, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular in claim 1, lines 5-6 “an image folder at the time of depositing an image file which has an image file name including digit is present in the image folder” is not defined or distinctly claimed in a way one skilled in the art can understand the subject matter which applicant regard as invention.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-6, are rejected under 35 U.S.C. 102(a) as being anticipated by Hayashi (EP0982667).

Art Unit: 2626

4. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

With respect to claim 1, Hayashi discloses an image file managing method, (as shown in fig 1-2), comprising the steps of: using a recording medium (memory 24 of fig 1) which has unique identification information, see (col.7, paragraph 0033-0034) recorded in a rewrite impossible area; discriminating (CPU 28 of fig 2, discriminate) between presence and absence of an image folder (image folder out of memory card 46 of fig 2) having an image folder name corresponding to the identification information (folder ID number shown in 24e of fig 4), at the time of depositing an image file recorded on the recording medium (24 of fig 1) in an image filing apparatus, see (col.8, lines 25-30); depositing the image file in the image folder is present, see (col.1, lines 45-50); and creating an image folder having the image folder name corresponding to the identification information when the image folder is not present and depositing the image file in the created image folder, see col.1, lines 40-45).

With respect to claim 2, Hayashi discloses an image file managing method, (as shown in fig 1-2), wherein an image file name is created by adding 1 to an image file name, see (col. 5, lines 35-40), which has a largest number out of deposited image files, see col.5, lines 25-34), and an image file deposited with this created image file name when an identical image file names is

present in an image folder at the time of depositing an image file which has an image file name including a digit is present in the image folder, see (col.5, lines 50-55).

With respect to claim 3, Hayashi discloses an image file managing method, (as shown in fig 1-2), wherein the identification information on the recording medium (24 of fig 2) is read so that access can be made only to image files in an image folder which has an image folder name corresponding to the identification information, see (col.5, lines 50-55), image folder name is created by enciphering the identification information, see (col.5. lines 35-40)

With respect to claim 4, Hayashi discloses an image file managing method, (as shown in fig 1-2), wherein the image folder name is created by enciphering the identification information, see (col.5, lines 35-40).

With respect to claim 5, Hayashi discloses an electronic camera (14 of fig 1) which records image data on a recording medium (memory 24 of fig 1) by using the recording medium which has unique identification information (24e of fig 1, ID information), recorded in a rewrite impossible area the camera (14 of fig 2) comprising: an identification information acquiring device (CPU 28 of fig 2) which acquires the identification information from the recording medium (24 of fig 2); an image folder creating device (CPU 28 of fig 2) which creates an image folder having an image folder name corresponding to the identification information, see (col.5,

Art Unit: 2626

lines 35-40) when an image folder having the image folder name corresponding to the identification information is not present or when the recording medium (24 of fig 2) is initialized; and a deposits device which deposits image data acquired at a photographing time as an image file together with an image file name in the image folder, see(col.5, lines 30-33).

With respect to claim 6, Hayashi discloses an image file managing method, (as shown in fig 1-2),image data on a recording medium (memory 24 of fig 1) by using the recording medium which has unique identification information (24e of fig 1, ID information), recorded in a rewrite impossible area the camera (14 of fig 2) comprising: an identification information acquiring device (CPU 28 of fig 2) which acquires the identification information from the recording medium (24 of fig 2); an image folder creating device (CPU 28 of fig 2) which creates an image folder having an image folder name corresponding to the identification information, see (col.5, lines 35-40) when an image folder having the image folder name corresponding to the identification information is not present, see (col.5, lines 35-40); and depositing device which deposits an image file recorder on the recording medium (24 of fig 2) in the image folder corresponding to the recording medium, (memory 24 of fig 2).
